

20 oz. Twin Electric Giant Pedestal Popper On 7' Knock Down Table

800 one ounce servings per hour. The knock down table is one of the first in the industry!

Designed to be knocked down to a few simple pieces, it makes shipping easier and less expensive. The shipping volume is reduced to one third of the regular table size. The table has two shelves for pedestal popper or caramelizer installation, and a corn chute for easy transfer of popped product from receiving tray to storage container. Our design provides the capability to increase production and create product variety.
